

Help to help others with UWB

Objective:

The objective of this challenge is to develop an application that uses Ultra-wideband technology to improve people's lives in a social context. UWB technology has the potential to revolutionize the way we interact with the world around us. By using UWB, we can create applications that are more accurate, more reliable, and more secure than ever before. This challenge is a great opportunity to use your creativity and technical skills to make a real difference in the world.

Challenge:

Use UWB technology to create an application that allows users to help each other after an environmental catastrophe

Constraints:

- Applications must be developed using UWB technology.

Have fun and be creative!
