What we brought this time

– Early access to our brand new **Time of Flight Camera Module** for Raspberry Pi

  – A 3D camera, delivering **depth information** for 640x480 pixels

  – A software library to access this camera on the **Raspberry Pi**

  – Getting started examples & workshop on how to extract **point clouds** with depth information using the library

  – Our **product experts** who can support you during the event

Your task

– You are **free** to implement **any project** using our technology

– We want **you** to **decide** what you want to build with our 3D cam

– Typical **use cases** are: 3D scanning, face authentication, augmented reality, robotics
